BOURNEMOUTH NATURAL SCIENCE SOCIETY & MUSEUM

The Society

Formed in 1903, the Bournemouth Natural Science Society (BNSS) is a registered charity whose aim is to promote the study, interest & enjoyment in all branches of the natural sciences and history.

The Museum

Housed in a Grade II Listed Victorian villa, the museum holds collections donated by early members. The collections are a valuable record of how the natural sciences were studied in the past. Before photography became widely used, specimens of flowers, animals, birds, and insects were collected & preserved for study.

Highlights

An Egyptian mummy, moths & butterflies, dinosaur footprints, minerals & fossils, rare bird specimens, & a Curiosity Cabinet!
